DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Friday, 19 January 2024 at 05:32 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Low levels of air pollution are expected on Friday as the recent cold weather continues across much of the UK.

Tomorrow: A gradual breakdown of the recent cold weather will result in strengthening winds across the UK. This will ensure that air pollution levels remain Low on Saturday.

Outlook: A milder, but more unsettled period with strong winds and spells of rain moving across the country. This will help disperse any air pollutants with levels remaining Low throughout.
